Company Data

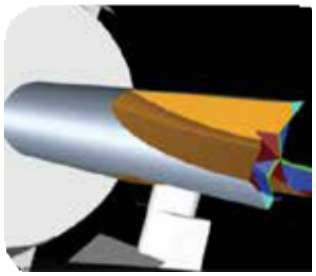
UEI: U5JTDBXMNCK5
CAGE code: 11XG3
NAICS code: 333515 - Cutting Tool and Machine Tool Accessory Manufacturing

Core Competencies

Our award-winning team of tool craftsmen boast proven proficiency in four core competencies.

- Design of custom carbide tooling to solve unique production applications and challenging machining problems.
- Manufacture of solid carbide cutting tools from 1 piece to thousands with tolerances in the microns.
- Custom tooling modifications such as, chip splitters, tapers, corner radii, and neck reliefs.
- High quality full-service cutting tool reconditioning and PVD coating services.

Differentiators

In 2019, KV Tooling Systems won the **ANCA Tool of the Year Competition**. The award pitted companies from all over the world in a competitive test of skills in toolmaking. KV Tooling won in all categories: complexity, finish, and adherence to tolerances.


- State of the art linear 5-Axis CNC machines.
- Optical laser inspection equipment.
- Precision drag finish honing equipment.
- Laser engraving for clear legibility of tool numbers.
- Full material lot traceability.
- Holding .0002” tolerances in batch quantities of 3 to thousands.
- Climate-controlled facility.
- 3D Simulation capability.
